

Sharing your medical information

This surgeries clinical system is migrating to another system

The surgeries clinical system is migrating to SystemOne

- **For a number of years work has been ongoing to improve the way medical records are made available to treating clinicians. Our main computer system is called SystemOne, which has the advantage of enabling information to be shared between certain health professionals.**
- **Enhanced Data Sharing Model (EDSM) enables us, with your consent, to share medical records with those in the NHS who are involved in your care. NHS staff can only access shared information if they are involved in your care and being an electronic service, an audit is maintained showing when and who has accessed medical records**
- **For full information – please ask reception for a ‘Sharing your Medical Information’ Leaflet**
